

August 14: Iwatani Hydrogen Station Update- Sacramento Region and Statewide Hydrogen Supply

Dear FCEV Drivers,

We understand that the Iwatani West Sacramento station will be your only hydrogen fueling option in the region for a period of time. We know this creates a challenging situation for you to get fuel, and we deeply appreciate your patience while our team actively works with partners to implement countermeasures and dedicate more resources to the region. More details will be shared as soon as possible.

Additionally, our hydrogen supplier has experienced a disruption that will impact the availability of hydrogen at all Iwatani stations. We currently do not have an ETA to return to normal service levels and we continue to pursue alternative options. Please monitor the individual station status for the most up to date information. We greatly appreciate your patience for the additional downtime this will cause.

Thank you again for being a dedicated partner in the quest for carbon neutral transportation.

Should you have any questions, please reach out to station customer service at (866) 384-4829.

Sincerely,

Your Iwatani Hydrogen Team
