Air Products Hydrogen Refueling Station at Torrance

Some good news to share. Air Products will begin operating the hydrogen refueling station in Torrance at 2051 W. 190th St. after completing renovations and other work at the site.

Starting Monday, January 13th, 2025, the station will be open daily for public fueling between 9:00 am and 1:00 pm. We anticipate the station to be fully open for 24-hour fueling starting Saturday, January 20th.

Please continue to monitor the Hydrogen Fuel Cell Partnership's Station Status website for station status.
