

NOTICE: During periods of high humidity or increased use, the nozzle may become frozen and difficult to disconnect from the vehicle. If this occurs, **DO NOT POUR WATER OR SPRAY ANY CHEMICALS ON THE NOZZLE** as this may damage it.

Prior to fueling, wipe down the nozzle with a lint-free cloth.

If the nozzle becomes frozen, pull the collar back with one hand while pushing forward on the handle. This may help release the nozzle locking mechanism and aid removal.

Placing the nozzle back in the dispenser holster will start an air dryer mechanism, which assists in drying the nozzle. The sound of the air dryer is normal.
