

## **True Zero Update: Southern CA Supply Disruption**

September 21, 2023

Southern CA FCEV Drivers,

We regret to inform you that our supplier of gaseous hydrogen for our Southern California stations experienced a major service disruption, which has stopped our supply of gaseous hydrogen. We do not have an estimated date for when hydrogen supply for these stations will resume.

As a result of the supply disruption, we expect the following Southern CA stations to experience fuel shortages:

- Costa Mesa - Harbor
- Del Mar
- Hollywood
- La Canada Flintridge
- Lake Forest
- Long Beach
- Playa Del Rey
- Santa Barbara
- South Pasadena
- Thousand Oaks

This supply disruption does not impact the other True Zero stations in Southern CA. Please check [H2fcp.org](https://H2fcp.org) for station status.

We apologize for this inconvenience and are working hard to restore our hydrogen supply as quickly as possible.

Sincerely,  
True Zero
