

# NEW HYDROGEN NOZZLE NEWS

Select stations have replaced the WEH Nozzle with an updated version manufactured by Walther. Although the overall refueling process is similar to the previous experience, there are some changes that you should be aware of prior to visiting.

## WALTHER NOZZLE HOW TO

Follow these simple instructions to refill your Fuel Cell Vehicle using the new Walther nozzle.

- 1.** Grasp the black handle with one hand, and support the blue collar with the other.
- 2.** Place the nozzle on your vehicle's fuel receptacle and push toward the car using the handle.
- 3.** To make sure you have a positive connection, gently tug on the handle.
- 4.** Begin fueling vehicle.
- 5.** Once fueling is finished, grab the black handle with one hand while supporting the blue collar with the other, just as before.
- 6.** Pull on the collar and the nozzle will release. Keep pulling until the nozzle is fully disconnected.
